

I am very disappointed that the FCC would even consider weakening the WI no call list. I have put up with the telemarketers calling for years. I would get at least 3-4 calls every night. When they brought forth the no call list for WI it was great. Me and my family were finally able to relax in the evening. I dont think anyone else in this state that was signed up is missing the calls at dinner or after bed time. I Wish for you to keep the no call list in tact. If a person quit a bankers services there had to be a reason and I am sure they didnt want to be harassed by them for doing it. I dont feel they should be given the right to harass people...which is what I consider these unwanted phone calls. If someone comes up with a petition, I would surely sign it as would almost everyone in this state. So PLEASE dont loosen the restrictions on the no call list! Thanks Bruce
